SECTION 4: FIRST AID MEASURES

4.1 First Aid:

Ingestion: If ingested do not induce vomiting! If product has been swallowed drink plenty of

water or milk IMMEDIATELY. If the patient is vomiting, continue to offer water or milk. Never give water or milk to an unconscious person. Contact the nearest Poison Control Center or local emergency number. Provide an estimate of the time at which the material was ingested and the amount of substance that was

swallowed.

Skin: If irritation occurs & product is on the skin, rinse thoroughly with lukewarm water,

followed by a thorough washing of the affected area with plenty of soap and water. Remove contaminated clothing and wash thoroughly before reuse. If

irritation, redness or swelling persists, consult a physician immediately.

Eyes: If product gets in the eyes, flush with copious amounts of lukewarm water for at

least 15 minutes. Raise and lower eyelid(s) while flushing to ensure thorough

irrigation. If problem persist seek immediate medical attention.

Inhalation: In the event of massive inhalation Remove Victim to fresh air and keep

comfortable for breathing.

4.2 Effects of Exposure:

Ingestion: If product is swallowed, may cause vomiting and/or diarrhea and central nervous

system depression.

Eyes: Moderately irritating to the eyes.

Skin: May be irritating to skin. The product can cause allergic skin reactions (e.g.,

rashes, welts, dermatitis) in some sensitive individuals upon prolonged or

repeated exposure.

Inhalation: Vapors of this product may be moderately irritating to the nose, throat and other

tissues of the respiratory system. Symptoms of overexposure can include coughing, wheezing, nasal congestion, and difficulty breathing. Inhalation of concentrated vapors can cause central nervous system depression (e.g.,

drowsiness, dizziness, headaches, nausea).

4.3 Symptoms of Overexposure:

Ingestion: May cause vomiting and/or diarrhea and central nervous system depression.

Eyes: Overexposure in eyes may cause redness; itching and watering (risk of serious

damage to eyes). Contact may cause mild eye irritation including stinging,

watering and redness.

Skin: Prolonged contact with skin may result in bleaching and irritation of skin. The

product can cause allergic skin reactions (e.g., rashes, welts, dermatitis) in some sensitive individuals. Symptoms of skin overexposure may include redness,

Itching, and irritation of affected areas.

Inhalation: Symptoms of overexposure may include coughing, wheezing, nasal congestion, and

difficulty breathing.

4.4 Acute Health Effects:

Moderate irritation to eyes and skin near affected areas. Additionally, high concentrations of vapors can cause drowsiness, dizziness, headaches and nausea.

4.5 Chronic Health Effects:

No harmful or chronic health effects are expected to occur from a single accidental ingestion. These ingredients may be irritating to the skin and mucous membrane of the eye and respiratory system. Overexposure may trigger asthma-like symptoms in some sensitive individuals. May also induce skin sensitization and respiratory hypersensitivity. Possible allergic dermatitis.

4.6 Target Organs:

Eyes, skin, respiratory system.

4.7 Medical Conditions Aggravated by Exposure:

Acute health hazards may be delayed. Most common symptoms include irritating properties to eyes, respiratory system and skin. Existing dermatological conditions (such as eczema) and respiratory conditions (such as bronchial asthma and/or bronchitis) may be exacerbated.

SECTION 5: FIRE FIGHTING MEASURES

5.1 Fire & Explosion hazards:

Level 1 Aerosol (NFPA 30B), Aerosols may burst at temperatures above 120 °F. Cool uninvolved containers to prevent possible bursting. Aerosols may be projectile hazards when bursting. If aerosols are bursting, stay clear until bursting is complete. Containers may rupture and release flammable liquids or exposed gasses if exposed to the heat of fire. Keep containers cool by spraying them with water until the fire has been extinguished.

5.2 Extinguishing Methods:

Water Fog, Foam, Dry Chemical, CO2

5.3 Firefighting Procedures

As in any fire, wear MSHA/NIOSH approved self-contained breathing apparatus (pressure demand) full and protective gear. Keep containers cool until well after the fire is out. Use water spray to cool fire exposed surfaces and to protect personnel. Fight fire upwind. Avoid spraying water directly into storage containers because of danger of boil over. Prevent run off from fire control or dilution from entering sewers, drains, drinking water supply, or any natural waterway. Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.

SECTION 6: ACCIDENTIAL RELEASE MEASURES

Spills: Before cleaning any spill or leak, individual involved in a spill cleanup must wear

appropriate Personal Protective Equipment. Plastic or rubber gloves, respirator, eye

protection and apron may be required for clean-up of large spills.

Small Spills: Wear appropriate protective equipment including gloves and protective eyewear. Use a

non-combustible material such as vermiculite or sand to soak up the product and place into a container for later disposal. Do not use water or a material such as "speed dry" to soak up material. Sweep up material using non-sparkling materials (e.g., plastic brooms, shovels, dustpans) and place into a plastic container or plastic liner within another

container.

Large Spills: Keep incompatible materials (e.g., organics such as oil) away from spill. Stay upwind and

away from spill or release. Isolate immediate hazard area and keep unauthorized personnel out of area. Stop spill or release if it can be done with minimal risk. Wear appropriate protective equipment including respiratory protection as conditions warrant.

SECTION 7: HANDLING AND STORAGE

7.1 Work & Hygiene Practices:

Do not eat, drink or smoke when handling this product. Contents under pressure. Handle as to avoid puncturing container(s). When used as intended, no additional protective equipment is necessary. Use chemical goggles if eye contact is possible. Wash unintentional residues with soap and warm water.

7.2 Storage & Handling:

Use and store in a cool, dry, well-ventilated location (e.g., exhaust ventilation fans) away from heat and direct sunlight. Avoid temperatures above 120°F. Keep away from incompatible substances. Protect containers from physical damage. To avoid unintentional spraying keep cap in place when not in use. Storage level 1.

7.3 Special Precautions:

Spilled material presents a slipping hazard if left unattended. Clean all spills promptly.
